

Enable your children!

Children who love to learn will become self-determined and self-confident individuals.

Children with a passion for knowledge will become contributors to the development of their community and Egypt.

What makes SESC able to enable?

SESC belongs to the SEKEM Development Foundation, an Egyptian NGO, founded in 1984 by the alternative-Nobel-Peace-Prize-awarded Dr. Ibrahim Abouleish.

SEKEM Enviromental Science Center

Come and Spend a Memorable Journey With US

Our Objectives:

- Strengthening the concept of learning outside the classroom.
- Teaching environmental sciences and its principles.
- Using inquiry-based and hands-on educational methods.
- Increasing environmental awareness.
- Enabling students to participate in society.
- Fostering of creative thinking among students.

Tailor-made, hands-on education that suits your students' needs and school's curriculum. We offer more than 50 different field trips as well as a tour around the Sekem farm to explore, discover and experience productive sustainable community. The field trips are offered to students of all grades, with a special focus on the younger ones.
